Notes:

The only module you need to consider closing before Fixed Assets is Payables Management to ensure all transactions coming from Payables have been capitalised in the Fixed Assets system (if you are using the interface from purchasing to FA).

You can close this module off before the other modules.

The year-end routine can be run at a separate time for each fixed asset book or it can be run for all books at the same time.

This routine must be completed before you can run depreciation for the new year. You must complete the current year's depreciation to the last day of the current year before rolling over the year.

2 Fixed Assets Year End Closing *Summary*

All users to be logged out of Dynamics GP when processing the Year end

- 1. Complete payables year end.
- 2. Check Fixed assets calendar
- 3. Enter and post all activity for the current year.
- 4. Run depreciation for all assets to the last day of the current financial year (make a back up of the company database first)
- 5. Process the GL interface
- 6. Run Asset reports
- 7. Make a back up of the company database
- 8. Run the Fixed assets Year end
- 9. Make a final back up of the company database

3 Detailed Fixed Assets Year End *Checklist*

- 1. Complete Payables year-end if using the payables interface to FA. This will ensure all transactions are capitalized in Fixed Assets.
- Ensure the Fixed Assets Calendar is built correctly.
 Financial > Utilities > Fixed Assets > Build Calendar. Click on Inquire.
- 3. Enter in all activity for the current financial year for the book that you are closing. This includes additions, changes, transfers and retirements.
- 4. Run depreciation on all assets through the last day of the current financial year for the book that you are closing.
- Process the GL Interface (GL Posting) routine.
 (Financial > Routines > Fixed Assets > GL Posting).
- 6. . Run reports, specifically reports which include year-to-date depreciation amounts as that information is not saved for previous/closed financial years in Fixed Assets. Some suggested reports that are normally run at year-end are:
 - Annual Activity
 - Additions Retirements Transfers Depreciation Ledger Property Ledger
 - Fixed Assets to General Ledger Reconciliation
 - These reports can be found under Financial > Reports > Fixed Assets > Activity, Transactions and
 - Depreciation

Note in GP2015 an optional report is now available when you close a year in Fixed Assets. The assets that are included on the report are categorized by asset book and are listed according to their asset IDs. The report also lists the current fiscal year for each asset book, as well as any adjustments that were made to the assets during the process of closing the year

The Book to Book Reconciliation and Book to Book YTD Depreciation Comparison reports are also available for comparing any two fixed assets books. (Financial > Reports > Fixed Assets > comparison) There are over 25 standard reports that may be run. You may elect to print these reports to a file as well so you can choose to print them again in the future, if needed.

- 7. Make a backup of the company database
- 8. Closing the Fixed Assets Year. The Fixed Assets year end routine is performed at: Financial > Routines > Fixed Assets > Year End:

🅼 Asset Year End -	TW014	(sa)				
Cancel Continue Actions	File ▼ File	Tools Tools	Help Add Help			
Available Books: Fiscal 2017 - AMT Fiscal 2017 - FEDERA Fiscal 2017 - INTERN			<u> </u>	ent >> emo <u>v</u> e	Selected Books:	

A) Verify that the Current Financial Year on the Available Books list is correct.

B) Select each book to be closed by highlighting the book in the Available Books list and clicking Insert. The year-end process will be performed for each book in the Selected Books list.

C) Click the Continue Button. The year-end process will begin. A report is not generated from this process.

D) Verify that year-end completed successfully by using reports and inquiries. Check the Fixed assets book setup to make sure the year has moved forward

(Financial > Setup > Fixed Assets > Book)

9. Make a backup of all company data and place it in a safe permanent storage. This gives you a permanent record of the company's financial position at the end of the year, and can be restored later, if necessary.
